

INMATE TABLET SERVICE UPDATE: Effective September 2021, inmates will have access to inmate tablets provided by Global Tel Link (GTL) which allows video visit calls and other program services.

Effective September 2021, inmates will have access to inmate tablets provided by Global Tel Link (GTL). During assigned times, inmates have access to an inmate tablet for video visitation with approved visitors. Tablets will be provided at no cost to inmates although access to certain premium features, such as video visits, movies, and games may incur charges.

Payment options include prepaid, and PIN debit.

GTL's GettingOut Account:

Friends and family are given the option to set up prepaid calling accounts (phone and tablet) using credit or debit cards and walk-in retail options.

GettingOut is a prepaid service that allows inmates in a correctional facility with a secure video visit option for approved visitors to connect more frequently and personally, which helps boost morale, increase positive behavior, and strengthens relationships. It also provides more access to content such as education, career and technical training, messaging, photo sharing, and multimedia content.

To establish and manage a GettingOut account, friends and family can call GTL at 1-866-516-0115 or online, [click here](#).

After funds are depleted, the system will prompt the account holder to add funds.
